20140103 WQS January 10 2014 FINAL (2) - JK edits.docx

Hey Karl –

I believe this is the most recent draft I have of the SUI WQS doc. The Animas has several different segments within SUI Reservation. They intended to have it transition from cold water fishery – to cool – to warm as it progresses from CO to NM border. Aq Life numbers/narratives would apply throughout. Don't know if Kirk made those changes in this version. They also intended to have Human Health uses apply throughout the Animas to the best of my knowledge. I do believe they made further changes to the doc after this (though maybe not to the Animas R pieces) and we'll want to contact Curtis Hartenstine or Kirk Lashmett at SUI to get the most current version.

Let me know if you need anything else.

Subject: HIGH PRIORITY - Southern Ute WQS for the Animas River

George and Tina,

For our water quality assessment of the Animas River, we'd like to get the Southern Ute WQS for the river. Let us know if more than one segment is involved.

Do we know if Southern Ute staff are currently sampling the Animas (since the spill)?
